

TAM SOLUTIONS

PROVEN, PREDICTABLE, PACKER PERFORMANCE

TAM PosiFrac™ Systems:

For swellable packer expertise, TAM now brings you the complete package.

As a market leader in swellable packer technology with 45 years of expertise, it's only natural that we've expanded our offering to include an integrated completion system for unconventional resources. With PosiFrac™ you have an all-inclusive, multi-stage system for open-hole hydraulic fracture applications. And you have the experts to run it from service centers in your region. This gives you unprecedented control and predictability allowing you to maximize efficiency. It also provides reassurance no one else can match: you'll get your completion on depth, on time, with the best swellable packers available. And that's as complete as it gets.
