Casing Circulator

NON TOP DRIVE CASING CIRCULATOR

Fill and Circulate Casing While Running

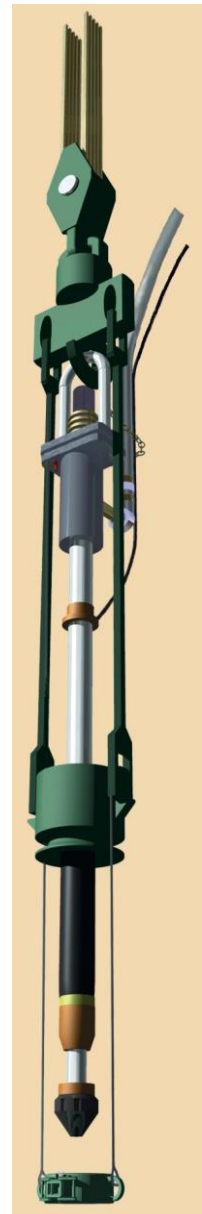

Location: Fort Worth, Texas

CHALLENGE: Run 4 ½ in. liner into a long horizontal well in the Fort Worth Basin with “sticky” hole conditions.

SOLUTION: Use the TAM Casing Circulator to circulate “bottoms up” when exiting the casing shoe and 17 more times while in the horizontal section.

RESULTS AND BENEFIT: Customer was able to get liner to bottom successfully.
