

GENERAL PRODUCT SHEET

TAM Abandonment Plug – Permanent Bridge Plug System

PRODUCT DESCRIPTION:

The TAM Abandonment Plug (TAP) is a highly reliable and robust solution for all Permanent Bridge Plug applications. The TAP can be deployed on Drill Pipe, Tubing or Coil Tubing and set in both Casing and Open Hole. Set the plug and place cement above in one run with the built-in full ID Release Sub.

PROVIDE SOLUTIONS FOR:

- Open or cased hole zonal isolation
- Permanent bridge plug for abandonments
- Lost circulation zones in harsh environments
- Cement base for sidetracking

FEATURES:

- Top Connections available are 3-1/2" IF, 2-7/8" EUE and Hydraulic Release profile
- Pressure balanced element during run in well
- Utilizes field proven valving for inflation
- Modular design allows for a variety of elements to be used depending on application
- Two built-in contingencies for deflation if recovery is required

BENEFITS:

- Robust design and shorter overall length enhances deployment in short radius trajectories
- Right-Hand release sub built into the tool reduces costs
- Operates in Vertical or horizontal wells with no reciprocation necessary
