

# CASE HISTORY

## P&A / Decommission: Temporary Abandonment

### Drop-off Sacrificial Tubing String for Plug and Abandonment

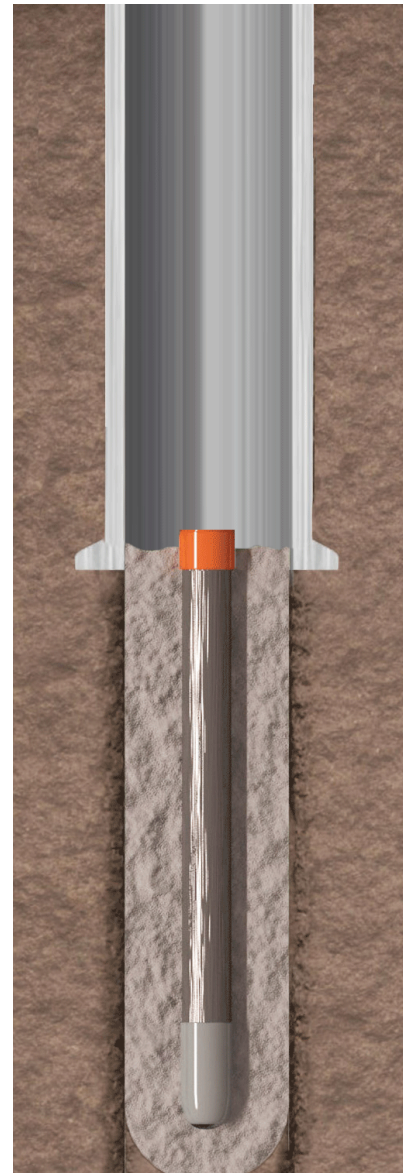

HR Tool - Hydraulic Release

Location: Morecambe Bay - United Kingdom

**CHALLENGE:** An operator with deviated wells in Morecambe Bay needed to displace cement on top of a bridge plug to plug and abandon their well.

**SOLUTION:** TAM provided the operator with a 4-3/4-in. Hydraulic Release Sub. The tool crossed over to the customer supplied sacrificial tubing to allow a balanced cement plug to be placed above a bridge plug for a five well plug and abandonment campaign.

**RESULTS AND BENEFIT:** TAM provided the customer a cost effective solution to positively displace cement and hydraulically drop-off sacrificial tubing in well.
