

# EPIC™ SOLUTIONS FROM TAM

ESSENTIAL PRODUCTS  
FOR INTEGRITY AND  
CONTAINMENT

## HATCH Packer

*PREMIUM CEMENT INTEGRITY SOLUTION  
FOR CRITICAL APPLICATIONS*

- Integral system utilizes inflatable Casing Annulus Packer (CAP) and patented metal-to-metal (MTM) Port Collar for stage cementing operations in production casing
- Elastomeric seals in inflation valve system are completely isolated following second stage cementing operations by engaging MTM seals in the Port Collar
- No cement is left in the casing leaving the operator an unrestricted, full bore ID with no drill-out required
- Operators have realized significant cost savings in over 150 successful installations worldwide by eliminating intermediate casing strings previously used to isolate shallow gas zones before cementing the production string

### **ENHANCE YOUR CEMENT JOB**

**Mitigate risks to personnel  
safety and the environment,  
ensure maximum production  
and reduce workovers.**
