TAM International Opens New Office in Edmonton Area to Serve Customer Growth

EDMONTON, Alberta – Sept. 13, 2011 – TAM International, Inc., an independent oilfield services company providing inflatable and swellable packers, today announced it opened a new office in Leduc, Canada. The office, which is strategically located in the vicinity of the Edmonton International Airport in the Leduc/Nisku corridor, will service a number of existing and prospective clients in the Central and Northern Alberta area.

TAM saw a need for a full-service location in Central and Northern Alberta due to increased business activity in the region. The new office location will help ensure that TAM field service technicians can respond to customers more quickly by decreasing travel time.

“The new TAM office in the Edmonton area is strategically positioned to take advantage of the increased activity of some of our key clients and provide TAM’s complete product line at the field level through local representatives in the region,” said Michael Machowski, Director of Canadian Operations. “There is a growing demand for our products and services, and we are looking forward to being in an area where we can service these demands.”

The complete TAM product line will be available with the opening of the new office, including swellable and inflatable zonal isolation packers that are used in open hole, cased hole, vertical and horizontal wells.

TAM products and services are designed for any drilling application where a customer needs to enhance the isolation of any zone. The applications for these products are expansive and can be used for shutting off or isolating water, gas or oil. Some of the most popular applications for TAM products are for open hole fracturing with sand or water, straddle acidizing in open or cased hole, permanent or temporary abandonments, testing, ground water isolation and cement enhancement.

Devon Gonas will be leading the office as the local District Manager. Gonas is experienced in all TAM tools, processes and procedures that are used in Canada.

The 5,600 sq. ft. TAM International Edmonton area office is located at Bay 3, 3923-81 Ave., Leduc, Alberta.
