

**TAM INTERNATIONAL**  
Inflatable and Swellable Packers

FOR IMMEDIATE RELEASE

**TAM COMPLETION SYSTEMS, A SUBSIDIARY OF TAM INTERNATIONAL, OPENS FIRST OFFICE IN NORTH DAKOTA**

*New Office to Serve Increased Customer Demand and Growth in the Bakken Shale Region*

**HOUSTON – Nov. 13, 2012** – TAM International, Inc., an independent oilfield services company providing inflatable and swellable packers, announced today the opening of a new office in Dickinson, North Dakota, to better serve the Bakken shale fields.

The North Dakota office will service the increased demand in business activity and customer growth in the region, as well as help strengthen customer relationships and leverage the growth of TAM's business.

"We believe the Bakken region will continue to grow, and we are excited about the opportunities that will come from having an office close to the shale play," said Michael Dion, Bakken Regional Manager.

The new 10,000-square-foot building on two acres of land, which opened Nov. 1, will handle a variety of TAM products including FREECAP<sup>®</sup> Swellable Packers, PosiFrac<sup>™</sup> Multi-Stage Open Hole Frac Systems, PosiFrac<sup>™</sup> Open Hole Straddle Frac Systems, Casing Annulus Packers (CAP), Port Collars for cement integrity and Thru Tubing products for remedial stimulation and workovers.

TAM anticipates 15 employees working at the new office.

Dion will manage the office along with a regional team. The team will focus on improving TAM's customer support and building key relationships.

The new office is located at 11130 30J Street Southwest, Dickinson, N.D.
