

**TAM INTERNATIONAL**  
Inflatable and Swellable Packers

FOR IMMEDIATE RELEASE

**TAM INTERNATIONAL OPENS NEW CANADIAN MANUFACTURING FACILITY**  
**Facility allows growth in service, manufacturing capabilities and offers technical training**

**HOUSTON – June 4, 2012** – TAM International Inc., an independent oilfield services company providing inflatable and swellable packers, today announced the opening of the new Canadian regional headquarters, housing a manufacturing, service and training facility, in Calgary, Alberta. The new facility will double TAM's manufacturing capabilities and allow the company to provide tool repair and redressing services on a larger scale.

The Canadian energy market continues to grow at a rapid pace and the new Calgary office allows TAM to better respond with service, inventory and additional tool-building capacity to meet growing demand.

"The new facility represents the continued growth of TAM International as we move forward in Canada," said Mike Machowski, TAM International's Vice President of Canadian Operations. "The facility allows us to reduce dependence of manufacturing and repair services from third parties."

"This strategic move to a more modern facility will support TAM's global expansion plans, current Canadian operating centers and immediate client needs. With the growth in demand, the need of sufficient upgrades at the former facility as well as the lack of room for our personnel justified the new build."

The 24,000-square-foot facility will also be used as a training center. Technical training for TAM employees, customer technical product seminars and lunch & learns will be held at the new state-of-the-art facility. The office is located at 10341 50th St. SE, T2C 3E3.
